Data Protection Statement of Sidney Sussex College: Users of the College's Network

This statement explains how Sidney Sussex College handles and uses information we collect when you register your equipment to use our network.[1] The IT department requires your CRSid to be associated to the equipment you are registering to obtain an IP address for your use of the network. This is for network security and tracking your usage. The information is stored on the ClearPass server and is deleted 90 days after the device is disconnected. Switchshop Ltd assist with maintenance of the ClearPass server and we hold a data sharing agreement with Netservers.

Please review https://www.sid.cam.ac.uk/life-sidney/it/acceptable-use-network if you have any questions about connecting to the network here at Sidney Sussex College.
