

Data Protection Statement of Sidney Sussex College: Users of the College's Network

This statement explains how Sidney Sussex College handles and uses information we collect when you register your equipment to use our network.¹ The IT department requires your User ID to be associated to the equipment you are registering to obtain an IP number for your use of the network. This is for network security and tracking your usage. The information is stored for one year on the Firerack Management Server which is maintained by a third party, Netservers. We hold a data sharing agreement with Netservers.

Please review <https://www.sid.cam.ac.uk/life/comp> if you have any questions about connecting to the network here at Sidney Sussex College.

Date: May 2018
Author: College Data Protection Lead
Review: September 2018 (and yearly thereafter)

¹ In the rest of this document, "the College", "we" and "our" refer to Sidney Sussex College; and "you" and "yours" refers to individuals registering equipment to use our network.
